HAPevolve Leader Delivers Keynote about “The Patient Experience”

[HAPevolve](#) participated in “The Patient Experience,” an event hosted by one of HAPevolve’s newest Industry Partners, [Benchworks](#), at the Union League in Philadelphia.

Joe Tibbs, president of HAPevolve, delivered the keynote speech, emphasizing the importance of innovation in health care. Hospitals must proactively look for new solutions—especially those that reflect a disruptive approach—to ever-emerging challenges.

The session provided an opportunity for hospital executives to learn about technologies, solutions,

and approaches to help health care organizations provide more convenient, efficient and consumer-friendly services to match the consumerism prevalent in health care today.

For more information about the event or Benchworks, contact [Larry Estes](#), HAPevolve’s director, business development.
